Operation:

1. Battery Installation: Twist the end cap off, slide the included 18650 Rechargeable battery into the flashlight and twist on the end cap to secure the battery.
2. Once the batteries have been installed and secured, press the power button switch to turn the flashlight on/off and toggle the different modes.

Charging:

1. Grab the lighthouse and twist the handle counterclockwise to expose the USB C charge port.
2. Once connected to power, the power button will illuminate in red to indicate charging is active.
3. Once fully charged, the power button will illuminate green.

NOTE: DO NOT overcharge battery. Improper charging will effect long term battery health.
